Updates on AgriSmart Activities

The last months have been full of activities for the Erasmus Plus “AgriSmart: Sustainability and digital skills for the agricultural sector” project partnership: the VOOC - Vocational Open Online Course – has been fine-tuned and has been published!

This is a great milestone for our project: the VOOC will contribute to upskill farmers and will play a key role in assuring a more sustainable and efficient farming systems, and we can't wait to have your feedback!

The AgriSmart Vocational Open Online Course (VOOC)

Our VOOC is finally online! As all Erasmus Plus results, it is freely accessible: have look [here!](#)

The VOOC represents a great effort made by all the partners: in few months, we developed a tailored and specialized open online course, that comprise the AgriSmart Learning Units (O2) and all the materials developed during the project.

The VOOC wants to represent an innovative and digital pedagogical experience, useful for VET providers and end-users in up-skilling their professional profile and acquiring specialized knowledge in more sustainable and efficient farming systems.

The VOOC is freely accessible and it contains the 6 Learning Units developed during the project: I) Common Agricultural Policy; II) Sustainable Agriculture; III) Water Management; IV) Sustainable Weed and Pest Management; V) Agriculture 4.0; and VI) Data for Sustainable Production, with tests (multiple choice Q&A) too, to verify knowledge levels around sustainable and digital skills in agriculture!

AgriSmart meeting: Nienburg

After the summer and few months after our first in-presence meeting in Athens, AgriSmart partners just had a transnational meeting in Nienburg, Germany, kindly hosted by DEULA, local partner. Several topics were analysed during the two-day meeting, with a particular focus on VOOC delivery and its translation in partners' languages.

Moreover, we set goals and plans for the next months, that will be full of activities: the National InfoDays are scheduled for February 2023 in each country, and we want to be sure that you all will be involved!

Group photo of AgriSmart partnership during the venue (28-30 September 2022) in Nienburg: thanks to DEULA for the warm welcome!

III NEWSLETTER –November2022

What's next!

The next period will be focused on the diffusion and implementation of the VOOC among stakeholders. Indeed, great efforts will be made regarding dissemination and communication: we wish that this great result is well received and adopted by industry stakeholders, to be used in promoting new skills for European farmers!

Furthermore, we are starting to organize National InfoDays, that will be crucial to raise awareness about the project and its topics, resulting fundamental to properly disseminate AgriSmart's results...so, be ready to be involved!

Stay updated!

We all know the importance of continuous professional updates and networking activities: to have a constant overview on project activities, to see the latest news about digital and sustainable agriculture, or to simply get in touch with us, you can reach us out on the following social media platforms:
