Updates on AgriSmart Activities

New year, fourth newsletter from Erasmus Plus “AgriSmart: Sustainability and digital skills for the agricultural sector” partnership: we are happy to share with you latest updates regarding the project, including a new version of our [website](#)!

Our VOOC – Vocational Open Online Course – is [online](#) and freely available in multiple languages to everyone interested in acquiring more skills about digital and sustainable agriculture! It contains the 6 Learning Units developed during the project: I) Common Agricultural Policy; II) Sustainable Agriculture; III) Water Management; IV) Sustainable Weed and Pest Management; V) Agriculture 4.0; and VI) Data for Sustainable Production, with tests (multiple choice Q&A) too, to verify knowledge levels around sustainable and digital skills in agriculture!

The AgriSmart InfoDays

As our project reaches milestones, it is time to get in touch with stakeholders and broader public, to assure a proper dissemination of AgriSmart results and deliverables. In this view, each partner is organizing a national “InfoDay”, to be held in February, inviting key national players (local institutions, trainers and academies, consultants...) to share ideas and experiences about project’s topic. A great chance to expand our network and to present and discuss our results!

The first appointment is the Italian event, organized by State University of Milan on the 15th of February.

Stay tuned for detailed program and the full release of the schedule!

IV NEWSLETTER – January 2023

AgriSmart meeting: Krakow

We are about to meet in Poland! On the 26th of January, the partners will be hosted by the local partner ARID, in Krakow, for a full day focused on fine-tuning of last deliverables, including the organization of the national InfoDays, with the definition of schedules and agendas. One of the last project meeting, crucial to reach last goals and to assure solid perspectives to the project!

Stay updated!

We all know the importance of continuous professional updates and networking activities: to have a constant overview on project activities, to see the latest news about digital and sustainable agriculture, or to simply get in touch with us, you can reach us out on the following social media platforms:

- **Facebook:** facebook.com/AgriSmartEU
- **Twitter:** [@AgriSmartEU](https://twitter.com/AgriSmartEU)

And visit our website for latest updates.

Stay tuned and follow us on social media!
